PERIODIC REPORTS AND DASHBOARDS

FEWS NET's monthly Food Assistance Outlook Briefs (FAOBs) provide projected estimates of the population in need of humanitarian assistance in each FEWS NET-monitored country seven months into the future, as well as a projection of anticipated acute food insecurity outcomes.

Food Systems Dashboard (Johns Hopkins University, GAINs) This dashboard combines data from multiple sources to provide a holistic view of food systems, including on drivers, food supply chains, food environments, individual factors and outcomes.

GIEWS Country Briefs (FAO) Up to date information on the food security situation of the 112 monitored countries.

Global Alliance for Food Security Dashboard (World Bank) Visualises data on acute food insecurity, funding flows and recommendations for policy and research to address food insecurity globally.

Global Food and Nutrition Security Country Dashboards (EC) Collates information from a variety of sources on key agro-economic indicators by country.

Harvest Earth Data (NASA) Combines datasets on COVID-19, crop conditions, trade, markets and food security.

HungerMap (WFP) Real-time monitoring and trends on key indicators that contribute to food insecurity including on hazards, conflict, undernourishment, food consumption, rainfall, and vegetation.

International Data & Economic Analysis (IDEA) **Database** Offers more than 10,000 data series from over 100 sources, providing data on agricultural labour and employment, food production, food security and nutrition.

Integrated Food Security Phase Classification (IPC) Country Analyses All the IPC country analyses on acute food insecurity, chronic food insecurity and acute malnutrition classifications.

Local Burden of Disease (University of Washington) Visualizes key indicators on health and nutrition on a global map.

Monthly Food Price Monitoring and Analysis Bulletin (FAO) The latest information and analyses on domestic prices of basic foods in developing countries as well as early warning on high food prices in countries where it may negatively affect food security.

Nutrition Landscape Information System (WHO) A searchable database of country-level nutrition indicators from WHO and other partner organizations.

World Bank Food Security Update A bi-weekly update on the global market outlook, emerging issues and regional updates.

NOTES ON REPORTS

Annual reports

CILSS Regional Report on Food Crises (FSIN/ CILSS) Q2 Produced by le Comité permanent inter-Etats de lutte contre la sécheresse dans le Sahel (CILSS) and the FSIN, it provides a comprehensive assessment of acute food insecurity following Cadre Harmonisé and GRFC protocols for CH countries. It aims to highlight regional acute food insecurity trends and figures for global and regional policy and decision makers.

Global Food Policy Report (IFPRI) Q2 IFPRI's flagship report reviews the major food policy issues, developments and decisions of the year, and highlights challenges and opportunities for the year to come at global and regional levels.

Global Report on Internal Displacement (IDMC) Q2 Produced by the Internal Displacement Monitoring Center (IDMC) it provides current figures and analysis on people displaced by disasters, conflict and violence at the global and regional levels. In 2023 it will include a special focus on food insecurity. The purpose is to inform policy and operational decision-making.

Joint Child Malnutrition Estimates (UNICEF, WHO, World Bank) Q2 The report provides global, regional and country-level estimates of child malnutrition for the previous year and describes the magnitude and patterns of under- and over-nutrition. It also assesses the progress of countries towards the 2030 SDG targets and since 2021 provides a regional analysis.

IGAD Regional Report on Food Crises (FSIN/ IGAD) Q3 The report provides a comprehensive assessment of acute food insecurity following GRFC protocols in IGAD countries, including Djibouti, Eritrea, Ethiopia, Kenya, Somalia, South Sudan, Sudan and Uganda. The purpose is to highlight acute food insecurity trends and figures for global and regional policy and decision makers.

International Food Security Assessment (USDA) Q3 Produced by the United States' Department of Agriculture Economic Research Service, and using a demand-driven analytical framework, the purpose of the report is to project food consumption, access, and gaps over a ten-year period, with annual updates to help USDA and its stakeholders evaluate the food security outlook of low- and middle-income countries.

State of Food Security and Nutrition Report (FAO, IFAD, UNICEF, WFP and WHO) Q3 The report presents a global assessment of the previous year's chronic food insecurity and nutrition situation. It informs on progress towards Sustainable Development Goal Targets 2.1 and 2.2 and presents the key challenges and policy recommendations to achieving these goals.

Global Food Security Index Global and Regional Reports (Economist) Q3 Produced by the Economist Intelligence Unit, supported by Corteva Agriscience, this index ranks over 100 lower-, middle- and upper-income countries' food security using a proprietary model based on food affordability, availability, safety and sustainability. Its purpose is to inform policy benchmarking, investment, advocacy, decision-making and research.

Global Humanitarian Overview (OCHA) Q4 Produced by OCHA in collaboration with partner organizations, this is an annual, multi-sectoral assessment of global humanitarian needs, their drivers and how to respond to the identified crises. It also describes the humanitarian systems' collective achievements. The purpose is to support large-scale resource mobilization and inform on accomplishments.

Global Hunger Index Report (Welthungerhilfe and Concern Worldwide) Q4 This report tracks hunger at global, regional and country levels based on undernourishment, child stunting, child wasting and child mortality. The scores and rankings are compiled into an annual peer-reviewed report that includes a thematic chapter and a focus on policy recommendations.

Global Nutrition Report (IEG) Q4 Produced by an Independent Experts Group, this multistakeholder initiative reports on the global state of nutrition and malnutrition drivers focusing on a different theme each year. It tracks commitments to alleviate malnutrition and makes recommendations for improvement.

Synthesis Report on the State of Food and Nutrition Security and Vulnerability in Southern Africa (SADC) Q4 This report provides an overview of the number of food and nutrition insecure people in Southern Africa based on data collected by country National Vulnerability Assessment Committees, as well as secondary data provided by other government entities and humanitarian and development partners. The purpose is to highlight regional acute food insecurity trends and figures for global and regional policy and decision makers.

Bi-annual reports

Food and Nutrition Insecurity Update (CILSS/ Cadre Harmonisé) Q2 and Q4 Based on country level analysis this report informs on current and projected acute food insecurity and nutrition in the Sahel and West Africa region. Findings are based on consensus and a convergence of data that examines food security and nutrition outcomes as well as drivers. It is part of an annual cycle embedded in national and regional policy decision making.

Global Report on Food Crises: Annual and Mid-Year Update (FSIN) Q2 and Q3 Produced by the Food Security Information Network (FSIN) and over a dozen partners, the GRFC is an independent and consensus-based report on food crises of the previous year including projections for the current year. It examines food insecurity, malnutrition and displacement data in a subset of countries requiring humanitarian assistance. The purpose is to provide information to food security and nutrition analysts, policy makers and advocates on countries experiencing high levels (magnitude and severity) of acute food insecurity.

Hunger Hotspots (FAO/WFP) Q2 and Q3 This report identifies countries where acute food insecurity is likely to increase in the coming months and provides a contextual analysis for the increased. The purpose is to serve as an early warning and call to action for operational agencies, decision makers and donors.

Quarterly reports

GIEWS Crop Prospects and Food Situation (FAO) Provides a forward-looking analysis of the food situation by geographic region, focusing on the cereal production outlook, market situation and food security conditions, with a particular attention on Low-Income Food-Deficit Countries (LIFDCs). The report also includes a list of countries requiring external assistance for food and the main drivers of food insecurity.

Global Operational Response Plan (WFP) This document informs WFP's operational planning across sectors of concern based on the most recent needs assessments and projections. Its purpose is to inform WFP operations as well as mobilization of funds.
